- PVC divided into two parts on the sides
- Front and rear window
- Hydraulic steering on the drawing bar
- LED road lights
- Storage box
- High clearance axles
- 2 extension beams
- Rear hitch
- Step for easy platform entrance
- Platform height: 2.7m, width: 2.5m

Many options available:

- Plate roof
- Hydraulic hoses reel
- Suspended axles
- Tandem steering axles (crab steering)
- Hydraulically foldable platform extension
- Water tank with pump
- Pneumatic brakes
- Etc.

HARVESTING BELTS

We offer highly durable and robust harvesting belts for easier and more efficient harvesting of your crop.

The belts are available in lengths of 7.5m, 9m and 12m and come in a foldable, or swingable version. Sweere also offers a wide range of options such as the harvesting in boxes kit, water spraying kit, folding table, and hydraulic movement within the trailer.

Foldable harvesting belt

The innovative hydraulic in-trailer folding system makes this belt a fast and easy solution for transporting the trailer, limiting the trailer width to just 2.5m.

Swingable belt

The swingable belt minimalizes the time for set up in the fields, and comes with a heavy duty support.

3 Point harvesting belt

Next to the trailer mounted belts we offer a foldable harvesting belt, which is mounted on a tractor's 3 point. The belt is easy to use, and has a gooseneck to transport the product up to an alongside driving trailer. Available in lengths of 18 up to 20m
